TOP VNR500 in Vietnam

Top small and medium enterprises

Chairman of the Board of Directors Couple Group
Ms. Xuyen Nguyen

"To be honest, I'm impressed with Base products because of your product-building mindset. As I can see, Base has researched on OKR (Objectives and Key Results), a management method associated with the success of the big firms like Google, Youtube, Intel ... In Vietnam, this term is still quite new, even there are not few companies have applied this method successfully... I believe in Base's products."

CEO Huy Thanh Jewelry
Mr. Do Huy Thanh

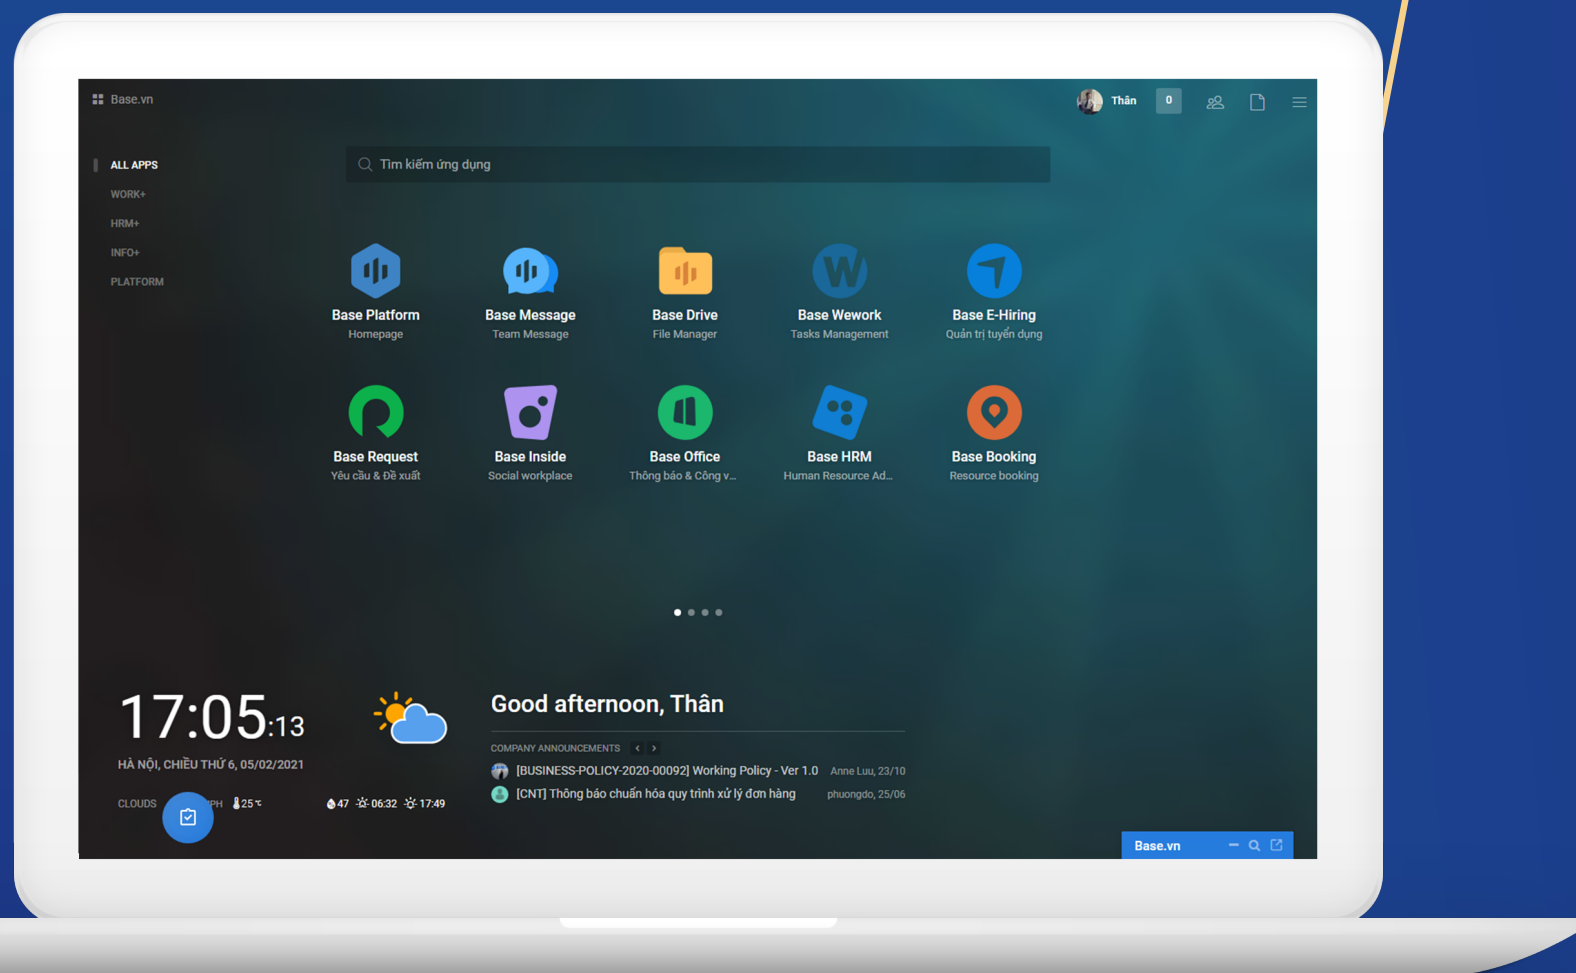

"In the process of developing my business increased from 20 people to 200 people, our current size is 10 times more. Now the number of papers, requests, and proposals of the employees is huge but CEO is not always in the office to review those. There are even several companies in the last outbreak that no longer have employees working together, so how do we communicate with each other and manage the tasks?
"The solution we used to solve the above problem is Base.vn"

CEO & Founder Twitter Beans Coffee
Miss Lam Thi Kieu Oanh

The operation and administration of the whole chain of stores is quite complicated. We have to manage not only the problem of allocating, measuring the workload for each employee and planning weekly/monthly work but also a lot of projects that run urgently in 24 hours. There are still small problems arising every day like coffee machines in that store are faulty, the light in the other store is broken, etc. Now we have Base Wework - project and work management application for us to update, remember and solve that kind of problem."

HRM+

Package to manage and comprehensively develop employees

Base HRM+ package helps enterprise manage and develop employees since the recruitment stage to the process of onboarding, training, reviewing and the development in employee's career. Base on comprehensive employee data, management can build an effective human resource planning, make accurate decisions and make good use of company's human resource in the development of company

Management recruitment and onboarding process

Base E-hiring help enterprises manage candidate resources and recruitment process, which increases rating talents and recruitment channel effectively.

Employee Data and Company Structure

Base HRM not only provides to enterprise a solution to store all data of an employee life cycle but also a tool to design a system of position, job function and company structure to help manager create an effective human resource plan

Checkin, approve timeoff and calculate payroll automatically

Provide a variety of way to checkin such as face recognition, GPS, attendance machine or mobile checkin. Besides, process of request a timeoff and calculate payroll made fully automatic helps saving time and cost for employee as well as company

OKR/KPI target management and review employee

Base Goal, Base Review help enterprise design target of company form level of company to that of employee base using either OKRs or KPIs system. Our system also support rating and reviewing employee on a time basis

Training and develop human resource.

Maintain the integrity and accuracy of attendance information as well as reduce the waste of time for C&B department

Work+

Package to manage work, process and approval

Base Work+ package supports enterprises to comprehensively manage productivity, establish and automate the process of each department as well as speed up the decision making process and approval proposals from managers. Thanks to that, the efficiency of work is improved, the collaboration of departments is enhanced, and the communication of staff smoothly works, which reduce the friction of the internal operation.

Build the comprehensive task management and evaluation system

Managing projects and tracking progress with Base Wework help enterprise evaluate working results of employees in a fair and transparent way.

Approve and make decisions on digital platform

Base Request helps enterprise standardize all required forms and business proposals, decentralize exclusively and exhaustively the process of proposal administration. With Base Request, all internal proposal decisions are processed quickly, systematically and transparently.

Design and measure internal processes

With Base Workflow, the working processes of each department are standardized, optimized for improvement. Enterprises can connect data and link processes with each other, promote interaction, monitor progress and measure efficiency.

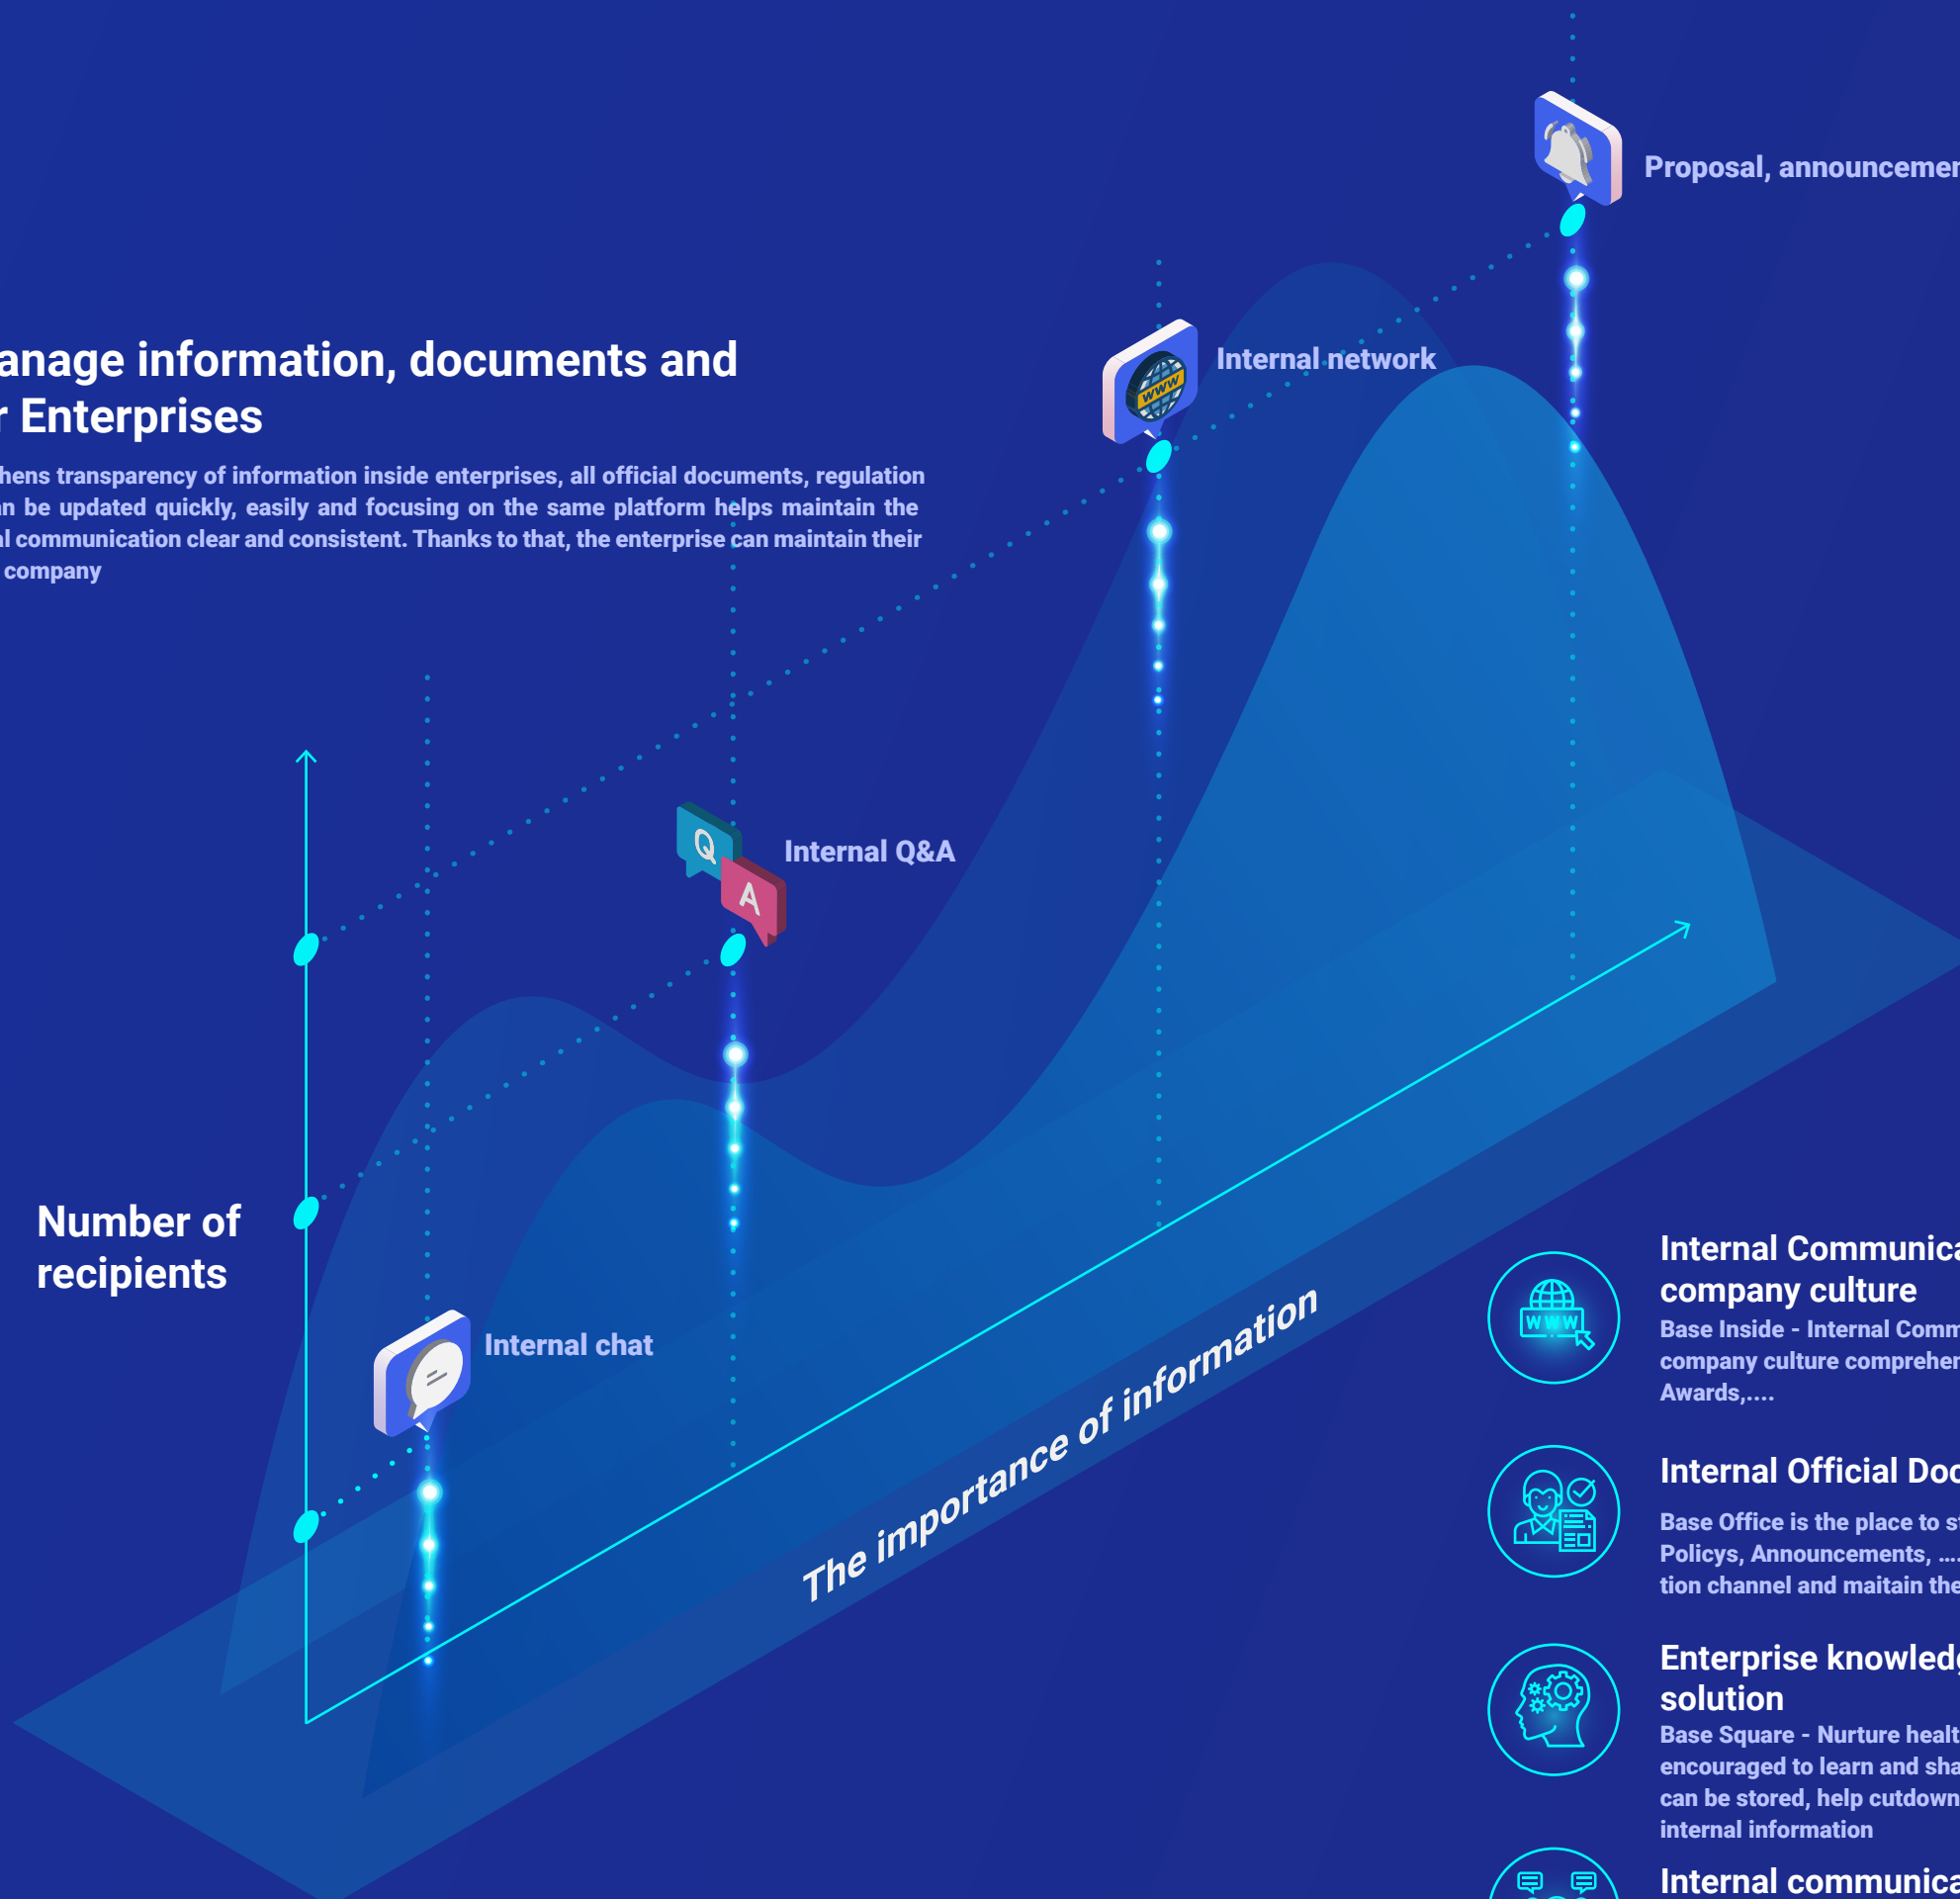

Manage meetings effectively

Base Meeting helps to organize meetings including: time, location, content and involved members. Base Meeting synchronizes with Google and Outlook schedules to make meetings effectively.

Info+

Package to manage information, documents and knowledge for Enterprises

Base Info+ package strengthens transparency of information inside enterprises, all official documents, regulation and internal information can be updated quickly, easily and focusing on the same platform helps maintain the information flow and internal communication clear and consistent. Thanks to that, the enterprise can maintain their vision and core value of the company

Internal Communication Network and building company culture

Base Inside - Internal Communication network of Enterprise helps build company culture comprehensively: Posts, Discussions, Voting, Awards,....

Internal Official Document Management

Base Office is the place to store and issue official documents such as Policies, Announcements, Helping enterprise have a formal information channel and maintain the accuracy of information.

Enterprise knowledge management and collaboration solution

Base Square - Nurture healthy culture in company in which everyone is encouraged to learn and share. Besides, knowledge in form of documents can be stored, help cutdown training cost and the potential risk with internal information

Internal communication network for enterprise

Base Message provide a fast and reliable way to communicate within company with features such as message, sharing image/documents or video call
